

How to use the software or Robot (and when) - 3 rules

(If you don't follow this rule you will fail...)

Dear friends,

If you want the software to be profitable for you – **you have to** follow all the trading rules. If you don't follow even one of the rules below – I can not guarantee to you a good winning ratio. I agree and understand that it is not easy to be a disciplined trader and always follow the rules – but we have to do it. Otherwise you will not be able to make a consistent profit with any buy/sell software or indicator:

Rule #1

Try to use the indicator ONLY during the London or US sessions (starting 1-2 hours before the opening is fine) It is risky to use the signals (not only this one but all others as well!) on a weak/slow market – outside recommended London or US sessions. Any buy/sell software may not work properly in a weak market, **this has been proven many times...**

Sometimes You are lucky and the market is strong and trending outside the U.K. and U.S market, but sometimes market can be very ranging outside recommended trading hours especially on a small timeframe like M5 (sample below). Once again I recommend to use the signals only on U.K. and U.S. sessions. Ranging market outside recommended trading hours sample:

Rule#2 (Very Important)

Make sure to watch a news calendar and stay away from trading before and after news releases. 90% of false signals are generated because of unexpected price moves on a news release.

bloomberg.com/markets/economic-calendar/

Rule#3

Use the software buy or sell signals only on a clear strong trend:

- Identify a current trend. **(Remember? The trend is your friend?)**
- Ignore all signals against a current trend!

Example:

Trend is up – but you get a “sell” signal (ignore it!)

Wait for a “buy” signal to enter.

Do not trade on a side (sideways trend) – ignore all signals.

Use Sideways market Software or Robot in Sideways market.

This rule is extremely important – MUST follow rule.

If you don't follow this rule you will fail...

Happy Trading!!!!!!!!!!!!
